

## The Britespan Advantage

### Natural Light & Ventilation

With bright, natural lighting and abundant ventilation inside, a Britespan fabric building provides a comforting environment for livestock, improving herd health and productivity. Eliminate the need for daytime lighting and improve worker safety within the shadow free environment.

### Wide Open Interiors

The open-span interiors in a Britespan building offer extraordinary height and clearance up to 300 feet wide. With no interior columns, you can maximize useable storage space and easily maneuver heavy equipment and vehicles within the building.

### Engineered Solutions

All of Britespan's structures are uniquely engineered to meet specific weather conditions and building codes. You can have confidence that your building has been engineered to withstand your local snow, wind and rain loads. Britespan fabric buildings are tested to the highest standards and built to stand the test of time.

### Speed of Construction

Utilizing a pre-engineered and modular design, all of Britespan's fabric structures are built in a fraction of the time when compared to conventional buildings, often in weeks rather than months. This means less operating down time for you, and a faster turnaround for generating profit.

### Corrosion Resistant

Britespan trusses are hot dip galvanized, post fabrication, to prevent any rusting. This quality standard provides lifelong corrosion resistance and maximum durability, even in the harshest environments.

### Local Support

When you buy a Britespan fabric building, you automatically get support from our network of "Local Experts". Dedicated to you, our dealers are experienced in providing support from project inception through completion. Be sure to ask our dealers about their "Lifetime Maintenance Program" - another reason to choose Britespan.
